

TTG (HK) Limited

# TTG: Big enough to deliver- small enough to care

*Jon Dingley  
Managing Director, TTG (HK) Ltd.*

**Q. *Why do we need financial planning and wealth management?***

A. Through financial planning you can get started by taking inventory of your current assets, budget, and other arrangements; setting and quantifying goals; and developing a plan to achieve your expectation. The conscious management of your financial circumstances, however modest they may be from time to time, will enable you to anticipate opportunities and prepare for contingencies.

**Q. *Why choose TTG as your financial planner and wealth manager?***

A. We believe every customer is unique and has different financial needs. Being independent, TTG offers flexibility and unbiased advice to address each individual's investment needs. We help our clients plan to be successful, whether it is in managing assets, protecting these assets, preparing a family trust, planning for retirement, educating your children or buying a property.

**Q. *What is TTG's approach?***

A. We work with our clients. This leads to an understanding of their goals, preferences, aspirations and expectations. We then apply our experience, technical expertise and influence to deliver the appropriate solution in financial

planning and wealth management. We endeavor to establish trust and long term partnerships with our clients.

**Q. *What are the costs and benefits TTG brings to their clients?***

A. One does not need to pay more for our advice. In fact, our clients can often pay less, as we utilize the buying power of major blue chip institutions to enable our clients to receive institutional discounts and other custodian type benefits. A simple example would be the utilization of "pooling" facilities offered by these custodians, which enable our clients to purchase funds at much lower levels than normally specified by certain fund houses.

**Q. *What is the minimum amount required to start off an investment portfolio with TTG?***

A. TTG's clients vary from high net worth individuals to those who are looking to accumulate wealth, so there is no minimum as such, as we will endeavor to find a solution for each investor. Basically, TTG is big enough to deliver, while at the same time small enough to care and value our client relationships.
